Spike Features:

Hammer’s got a new way to attack the pin deck with the new Hammer Spike. The Spike uses a high RG, high Differential core system that gives Hammer bowlers a new look at conquering drier lanes. Combining this core with the Taboo Jet Black’s coverstock (GTRIII) in a hybrid version gives the Spike a long move through the front of the lane, with a controlled but aggressive down-lane move. Take control of your game on drier lanes and pound the pocket with the new Hammer Spike!
