Maverick Pearl

FLYBY

...the competition

Ready to maneuver on any medium to heavy oil pattern, the new Maverick Pearl gives you more length and down lane motion than the Maverick.

EBONITE

MAVERICK PEARL

The Maverick Pearl is the newest addition to Ebonite's high performance line up. This Maverick is ready to maneuver on any medium to heavy oil pattern. It will give you more length and a stronger down lane motion than the original Maverick. Get ready to fly by the competition with the new Maverick Pearl.

MAVERICK CORE

We started with our successful Warrior core design and made minor modifications to the base, creating a dual band design enlarging the volume of mass away from the pin. This change allows the Maverick core to store more energy for the back end of the lane.

MAVERICK PEARL HIGH PERFORMANCE
