

EBONITE

MISSION:UNKNOWN

The Ebonite Mission is back and features the same great original Mission core, but this time wrapped in our GB 12.7 coverstock to give the longest, most angular motion in the history of the Mission series.

Opening a ball box has never been this exciting before!

This is a limited production run product and is called Mission Unknown for a reason.

The Mission Unknown will come in a box completely sealed so nobody will know what is inside until it is opened to reveal one of three versions: black, red, or the ultra-rare gold.

- Less than 1% of balls produced are the ultra rare GOLD
 - Lucky finders of a gold ball will receive a black ball and a limited edition Ebonite Mission jacket.
 - Finders should visit www.ebonite.com for instructions on how to claim their prize pack.
- Less than 10% of produced balls will be the rare RED
 - All consumers can register to win the limited edition Ebonite Mission jacket with no purchase necessary.
- This launch builds on the popularity of limited edition balls. Use it as a marketing tool to drive business in your shop.
- If your shop sells an **ULTRA RARE** Gold Mission Unknown, you, too will receive a limited edition Ebonite Mission jacket.

Unique packaging will not allow distributors, pro shop operators or consumers to view inside.

EBONITE
